DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-12 and 19-25 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 and 22 of US 6,531,051. Although the conflicting claims are not identical, they are not patentably distinct from each other.

US 6,531,051 discloses and claims a catalyst comprising at least one matrix, at least one zeolite, at least one element that is located at the matrix and selected from the group consisting of groups VIB, VIII, and VB, at least one promoter element, wherein the zeolite contains at least one element of group VB in its porous network (claim 1). The zeolite also contains at least one element of group VI and/or group VIII in its porous network (claim 4).

The difference between the instant claims and the claims of '837 is that the instant claims do not require the presence of a group VB element. However, one of

Art Unit: 1725

ordinary skill would recognize that the instant claims do not exclude the presence of additional elements, even in major proportions.

Response to Declaration

3. The Declaration under 37 CFR 1.132 filed 6/2/03 is sufficient to overcome the rejection of claims 1-12 and 19-25 based upon Usui et al.

Response to Arguments

4. Applicant's arguments filed 5/5/03 have been fully considered but they are not persuasive.

5. With regards to the Double Patenting rejection, applicant argues that this is a provisional which should be withdrawn and the case passed to issue. However, application 09/603,837 has become a patent and the rejection is no longer provisional. A terminal disclaimer is required to overcome this rejection.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 1725

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
